

SAVE ENERGY, TIME & MONEY! GET YOUR DRYER VENT CLEANED TODAY.

LINT IS ONE OF THE MOST FLAMMABLE ITEMS IN YOUR HOME. HOW MUCH IS LYING IN YOUR DRYER VENT?

ELIMINATE A FIRE HAZARD IN YOUR HOME AND IMPROVE THE ENERGY EFFICIENCY!

The Consumer Product Safety Commission estimates that there are approximately 15,600 clothes dryer fires resulting in 20 deaths, 370 injuries and \$75.4 million in property damage. Most people think cleaning their dryer's lint screen is enough to keep their clothes dryer running efficiently and safely. The fact is, lint can build up in the dryer's hose and vent creating costly and dangerous situations.

HOW OFTEN SHOULD YOUR DRYER VENT BE CLEANED OR INSPECTED?

According to the National Fire Protection Association, recommendations include "once a year, or more often if you notice that it is taking longer than normal for your clothes to dry. Clean lint out of the vent pipe or have a dryer lint removal service do it for you. Not only will your home be safer, your clothes will take less time to dry and you'll save on your energy bill."

SIGNS YOUR DRYER VENT MAY BE CLOGGED!

- It takes 2-4 cycles to dry one load of laundry.
- The outside of your dryer becomes hot to the touch.
- You notice a burning smell.
- Clothes are still hot and damp after the cycle ends.
- Your home is 4 years old or has not been inspected regularly.
